ELECTRIC

Please deny TRICO's proposed change to the current Net Metering tariff.

I believe that TRICO has a valid point concerning grid maintenance and other fixed co approach of changing the payoff for excess generated energy to monthly from annually is totally unrelated to the fixed cost issue, and is severely misguided.

The correct approach is to accurately separate fixed costs and energy usage, and bill them separately. At a given system capacity, fixed costs are not related to the amount of energy actual used. (and PV generation actually LOWERS fixed costs by reducing needed grid capacity, which benefits all customers) All customers, PV generating or otherwise, should pay the same monthly charge for the same grid access and maintenance and other fixed costs.

Additionally Solar City will not install any new systems until this is denied. If approved Solar City will no longer provide solar service to anyone within the Trico Power Grid allowing Trico to have a monopoly.
